# Kelly Hill

kelly.m.hill2115@gmail.com|512-956-6079 | LinkedIn| Portfolio | GitHub

*Front-end developer with 5+ years of experience building and maintaining mobile-first web applications for a live fan engagement platform used across collegiate and professional sporting events, collaborating within cross-functional agile teams to ship consistent, on-brand user experiences from concept to production.*

**Front-End Web Development | Responsive & Cross-Browser Design | UI/UX & Visual Design | Cross-Functional Collaboration**

- **Platform Scale:** Volunteered as part of a 10-person team to physically install over 30,000 QR-enabled seat tags across Yankee Stadium armrests within a 4-day turnaround, bringing a real-time fan engagement deployment to life at a major MLB venue.
- **Multi-Team Delivery:** Built, updated, and shipped up to 15 collegiate and professional sports web applications on a weekly cadence across 7 collegiate and 2 professional team accounts, all maintained within a single shared Vue.js codebase.
- **Client Business Impact:** Led a 5-month front-end redesign and lead-generation overhaul for an independent publisher's website, directly contributing to book sales growing from 124 to 470, according to Amazon Kindle Direct Publishing reporting.

## Professional Experience

**Software Engineer, Freelance Products** 02/2024 – Present

Design, build, and maintain independent web applications using Vue.js, React, and Next.js for external clients and personal projects, managing the front-end development lifecycle from design to deployment.

- Delivered a 5-month front-end rebuild and lead-generation optimization for Bamboo Village Books, contributing to book sales growing from 124 to 470 year-over-year (2024 to 2025).
- Designed and built a full-stack session scheduler website, simplifying functionality and centralizing scheduling organization between two locations.
- Rebuilt a client website from WordPress to Vue.js for Extrahands, resolving 3 key functionality, accessibility, and scalability issues for a production-ready, cross-device experience.
- Engineered a Next.js and TypeScript tech-networking dashboard integrating a Google Sheets database, tracking 42 attended events and 109 new connections over an 8-month period.

**Frontend Developer, Fan Engagement Team (Vue.js & UI/UX) | Digital Seat Media** 10/2021 – 04/2025

Delivered front-end development and UI/UX support for a mobile, QR-code-based fan engagement platform used by fans at live sporting events, building and maintaining mobile-first web applications within a Vue.js codebase for collegiate and professional sports organizations.

*Front-End Development & UI Implementation*

- Structured JSON-based configuration data from product manager tickets into reusable Vue card components, rendering images, text, and calls-to-action for the mobile platform.
- Verified game-day content accuracy across roster images, team logos, and branding assets, aligning event names, times, sport categories, and application IDs for error-free live displays.
- Contributed HTML, CSS, and visual design work to a Vue.js-based student mental health awareness application as part of a cross-functional build.

*Cross-Functional Collaboration & Agile Delivery*

- Collaborated via Jira with a cross-functional team, including 2 engineers, 2 designers, and a product manager, to ship front-end features alongside a dedicated QA team.

- Intentionally polished front-end deliverables pre-handoff to minimize downstream QA workload across the fan engagement app suite.
- Managed and updated up to 15 collegiate and professional sports web applications weekly, supporting 7 collegiate and 2 professional team accounts.

*Platform Support & Professional Growth*

- Supported a large-scale, in-venue fan engagement rollout by volunteering as part of a 10-person team to install 30,000+ QR-enabled seat tags across Yankee Stadium within 4 days.
- Earned strong year-end performance remarks for production quality and consistency across concurrent team accounts.
- Proactively studied React independently outside working hours to build in-demand front-end framework skills beyond the team's required Vue.js stack.

**Technology Associate and Lead STEM Instructor** | **iCode School Franchise** 04/2026 – Present

Deliver hands-on STEM instruction in programming fundamentals, AI, and web development to students ages 6 to 13 within a structured, sprint-based curriculum.

- Promoted to lead instructor, mentoring instructors and overseeing 100% daily lesson completion.
- Delivered a 5-day AI Engineering Basics camp to 6 students ages 10-13, teaching prompt engineering and Hugging Face AI models, achieving 100% course completion.
- Instructed 50 to 70 students across JavaScript, C#, Minecraft, and AI programming courses since April 2026, translating web development concepts into custom analogies for young learners.
- Guided student cohorts in JavaScript and Roblox/Blender courses to 100% completion and advancement to the next curriculum level through final project reviews.

**Personal Trainer and Nutritionist** | **Life Time Inc.** 07/2017 – 07/2022

Delivered customized fitness and nutrition programs and built client relationships within a high-volume, retention-focused personal training practice.

- Coached and delivered customized fitness and nutrition plans to 15 to 20 clients per month, sustaining an 85% to 90% client retention rate.
- Generated new business through proactive outreach, dedicating 2 to 3 hours daily to cold texts, calls, consulting, and emails to build a client base from the ground up.
- Tracked client progress using Google Sheets and a scheduling platform, sparking an interest in building custom software that led to a transition into web development.

## Education & Personal Development

**Postgraduate Program in Artificial Intelligence and Machine Learning** | University of Texas at Austin *(Feb 2024 - Aug 2024)*
**Master of Science in Human Nutrition** | Texas State University *(Jan 2012 - May 2015)*

## Technical Skills

**Languages & Frameworks:** JavaScript, TypeScript, React, Next.js, Vue.js
**Front-End & Design:** HTML5, CSS3, Tailwind, Responsive Web Design, Figma, Adobe Photoshop, Wireframing, Prototyping, A/B Testing
**Tools & Additional Exposure:** REST APIs, Node.js, Express, MongoDB, Supabase, AWS, Vercel, GitHub, JSON
