Frontend technologies: Vue.js, CSS

Data Format: JSON

Cloud: AWS

Designs: Adobe Photoshop (AP) and Illustrator, Figma, Graphic Design, Procreate, Responsive Design, UX/UI, Wireframing, Low and High Fidelity Mockups, Site Mapping, Prototypes, A/B Testing

Version Control: Git, GitHub

WORK EXPERIENCE

Digital Seat Media - Sports Technology Company - Mobile web-based platform providing interactive fan engagement at live events, allowing fans to scan a QR code-enabled tag on their seat. **Austin, TX**

Software Developer - Fan Engagement Team (Vue.js & UI/UX)

October 2021 - April 2025

- Led the design and implementation of apps used by over 30,000 fans at Yankee Stadium with QR code-based fan interactions. This enabled the company to collect real-time user feedback on fan-favorite items, resulting in a surge in fan interaction.
- Managed up to 15 collegiate and professional sports applications weekly for seven collegiate teams and two professional sports teams. Built custom fan engagement-focused applications, edited APIs, and oversaw quality assurance, with key focus areas on real-time fan interactions and retention.
- Launched design initiative with cross-functional teams to design and maintain mobile-first web applications. This drove user interactions and ensured fast load times as the apps had to be used immediately by fans at the stadiums and arenas.

KeLLab, LLC - First three letters of my name combined with Lab, for an experimental working partnership

Austin, TX

Software Developer - Freelance Products

February 2024 – Present

- [Bamboo Village Books](#) Publishing Company: Vue | JS | CSS | Figma | AP | AWS
Redesigned and developed the Bamboo Village Books website. Optimized its aesthetic features and built lead generation components to increase visibility and book sales with monthly maintenance. This resulted in 431 books sold as of October 2025, compared to the total of 124 books sold in 2024, according to Amazon Kindle Direct Publishing Reports.
- [Enhancing Elderly Lives with Extrahands](#): Vue | JS | CSS | AP | AWS
Rebuilt the client's website from WordPress using Vue.js. I addressed pain points in functionality, accessibility, and scalability. The result was a production-ready site with optimized performance across all devices for his expanding business.

Life Time Inc.

Austin, TX

Personal Trainer and Nutritionist

July 2017 – July 2022

- Delivered customized fitness and nutrition plans to 15-20 clients per month, achieving an average client retention rate of 85-90%.
- Pioneered outreach initiatives through cold texting and emailing, generating new business and building strong client relationships.

EDUCATION

Texas State University

San Marcos, TX

Master of Science in Human Nutrition and Thesis Research

January 2012 – May 2015

CERTIFICATION

University of Texas at Austin

Austin, TX

Postgraduate Program in Artificial Intelligence and Machine Learning

February 2024 – August 2024

- Focus: AI and ML technologies with practical Python, Data Analysis, and Model Building applications.

LEADERSHIP & ACHIEVEMENTS

- Artificial Intelligence and Machine Learning Hackathon certificate of participation for predicting the annual turnover rate of a restaurant, finishing 29th out of 123 participants.
- Shining Star certificate presented in 2017 for exceeding the standards set and high performance at Lifetime.
- Volunteer at the Capital Area Food Bank of Texas, supporting our local community with a mobile food pantry and food distribution. Also, a Volunteer at Second Harvest Food Bank, assisting with the sorting and packaging.
- Received excellent remarks in the year-end review at Digital Seat for App production and Quality of work.
