

SUMMARY

Versatile Software Developer with 5 years of experience. Proven track record of creating, designing, and implementing simple and intuitive frontend web applications, both product-side and service-oriented. Collaborates across teams, delivering user-focused experiences. Seeking to leverage my technical skills within a company that has global reach, where I can add value.

SKILLS

Languages: JavaScript (JS), Typescript

Frontend technologies: React, Next.js, Shadcn, Vue.js, CSS, Tailwind

Backend technologies: REST APIs, Node.js, Express

Database: MongoDB

Data Format: JSON

Cloud: AWS

Designs: Adobe Photoshop (AP), Figma, Responsive Design, UX/UI, Wireframing, Low and High Fidelity Mockups, Site Mapping, Prototypes, A/B Testing

Version Control: Git, GitHub

CERTIFICATION

University of Texas at Austin

Postgraduate Program in Artificial Intelligence and Machine Learning

Austin, TX

Feb 2024 – Aug 2024

- Focus: AI and ML technologies with practical Python, Data Analysis, and Model Building applications.

WORK EXPERIENCE

iCode School Franchise - Providing STEM education for kids and adolescents.

Austin, TX

Technology Associate and STEM instructor

Apr 2026 - Present

- Taught the five day AI Engineering Basics: Introduction To LLMS camp for students ages 10-13 on programming basics, Python, pretrained AI models from Hugging Face, and prompting to generate images and build a website for their final project, achieving 100% course completion.
- Taught three JavaScript classes for two students, overseeing completion of the end-of-semester assignments and final projects as it relates to code reviews and project presentations, demonstrating mastery of the curriculum and advancing to the next program level.
- Taught four classes to two students in the Programming in Roblox course, creating environments and animating objects using the Blender graphics software for their final project, and integration with Roblox, demonstrating 100% completion of the course and advancement to the next program level.

Digital Seat Media - Sports Technology Company - Mobile web-based platform providing interactive fan engagement at live events, allowing fans to scan a QR code-enabled tag on their seat to access merchandise, concessions, roster images, etc.

Austin, TX

Software Developer - Fan Engagement Team (Vue.js & UI/UX) : Vue | JSON | CSS | Figma | AP | AWS

Oct 2021 - Apr 2025

- Led the design and implementation of QR-based interaction apps used at Yankee Stadium, engaging over 30,000 fans and enabling real-time user feedback.
- Contributed to the codebase and managed up to 15 collegiate and professional sports applications weekly for seven collegiate teams and two professional sports teams. Built custom fan engagement-focused applications, edited APIs, and oversaw quality assurance, with key focus areas on real-time fan interactions and retention.
- Launched design initiative with cross-functional teams to design and maintain mobile-first web applications. This drove user interactions and ensured fast load times as the apps had to be used immediately by fans at the stadiums and arenas.

KeLLab

Austin, TX

Software Developer - Freelance Products

Feb 2024 – Present

- Data Command Center Tech Networking Dashboard: Next.JS | React | Typescript | Tailwind | Shadcn | Vercel
Engineered tech networking dashboard, enabling event tracking, relationship management, and analytics, that has averaged eight events and 22 invested connections over the past three months.
- Bamboo Village Books Publishing Company: Vue | JS | CSS | Figma | AP | AWS
Optimized website's aesthetic features, built lead generation components to increase visibility and book sales. This resulted in 470 books sold in 2025, compared to 124 books sold in 2024, according to Amazon Kindle Direct Publishing Reports.
- Patient Preoperative Surgery Checklist: Vue | JS | CSS | Figma | AP | AWS
The goal is to reduce the number of complications and cancelled surgeries by increasing patient safety and compliance through the use of this app, rather than hard-copy instructions that patients typically misplace.
- Enhancing Elderly Lives with Extrahands: Vue | JS | CSS | AP | AWS
Rebuilt the client's website from WordPress using Vue.js. Addressed 3 key pain points related to functionality, accessibility, and scalability, resulting in a production-ready site with optimized performance across all devices.

Life Time Inc.

Austin, TX

Personal Trainer and Nutritionist

July 2017 – July 2022

- Taught and delivered customized fitness and nutrition plans to 15-20 clients per month, achieving an average client retention rate of 85-90%.

- Pioneered outreach initiatives, dedicating 2-3 hours daily cold texting and emailing, generating new business, and building strong client relationships.

EDUCATION

Texas State University

Master of Science in Human Nutrition and Thesis Research

Dietetic Internship

San Marcos, TX

Jan 2012 – May 2015

June 2014 - May 2015

- Led nutrition groups and conducted screenings and assessments for patients.
- Created and delivered presentations that educated patients, athletes, children, and fellow students on healthy eating habits.
- Graduate Assistant: Instructed a Nutrition Food Systems laboratory for two semesters, assisted my professor with cancer research and grant writing, in addition to grading exams and research papers.

LEADERSHIP & ACHIEVEMENTS

- Artificial Intelligence and Machine Learning Hackathon certificate of participation for predicting the annual turnover rate of a restaurant, finishing 29th out of 123 participants.
- Received excellent remarks in the year-end review at Digital Seat for App production and Quality of work.
- Shining Star certificate presented in 2017 during the 2nd month of employment for exceeding the standards set and high performance at Lifetime.
- Volunteer at the Capital Area Food Bank of Texas, supporting our local community with a mobile food pantry and food distribution. Also, a Volunteer at Second Harvest Food Bank, assisting with the sorting and packaging.
